

iFlux CallTrack

Call accounting, cost intelligence and fraud management for regulated enterprises.

Attribute every call to the organisation as it stood at the time, rate it to the second, reconcile the carrier invoice and catch fraud within one detection cycle.

✓ Attribution that never rewrites history

✓ Rating you can defend

✓ Fraud caught in minutes

✓ On-premise or your own cloud

What iFlux CallTrack does for you

Attribution that never rewrites history

Calls are charged to the org chart as it stood on the day. Transfer and conference legs are stitched into one call and never double-counted.

Historical org chart

Leg stitching

Never double-counted

Rating you can defend

Per-second rating in exact minor currency units, invoice reconciliation and a rounding what-if that exposes the swing between carrier schemes.

Per-second rating

Invoice reconciliation

Rounding what-if

Fraud caught in minutes

Twelve built-in detectors plus custom rules and allowlists, with alerts to SNMP, syslog or your SIEM within five minutes.

12 detectors

Custom rules

Alerts in ≤5 min

Controls a bank expects

Maker-checker approval for money changes, a hash-chained audit log, field-level masking and sixteen scheduled reports with integrity hashes.

Maker-checker

Hash-chained audit

16 reports

Works with what you run

Live call-detail feed from the PBX

Survivable SFTP pickup

SNMP, syslog, CEF and SIEM forwarding

SAN, NAS, SFTP or object-storage backup

Spreadsheet org import and export

Specifications

Automated tests	925
Reports	16
Alert cycle	≤5 min
Attribution target	≥99.5 %
Deployment model	On-premise, air-gapped or bring your own cloud
Installation	Signed, offline installer

Where iFlux CallTrack makes the difference

Catch toll fraud before the invoice arrives

Fraudulent international and premium-rate calls are discovered a month later on the carrier bill.

OUTCOME

Minutes to detection, not weeks.

Charge departments correctly after a reorganisation

Every reorganisation rewrites historical call charges, so last quarter's numbers no longer match the audit.

OUTCOME

Audit-stable charge-backs.

Reconcile the carrier invoice to the second

Carrier invoices are accepted on trust because nobody can re-rate a month of calls.

OUTCOME

Variance within two percent, disputes with evidence.

See iFlux CallTrack on your own infrastructure.
