

iFlux Unified Communications

One phone system for the whole organisation, from desk and soft phones to analog lines.

A modern business phone system, on-premise or in your own cloud. Connect IP desk phones, softphones and the analog phones you already have, with the calling features your teams use every day and recording where you need it.

✓ Every phone on one system

✓ Analog phones, kept and modernised

✓ Everyday calling features

✓ On-premise or your own cloud

IP, soft and analog

Phones

Registration or trunk

Analog connection

Single box with recording, or distributed

Deployment

iFlux Recorder, by line or for everyone

Recording

What iFlux Unified Communications does for you

Every phone on one system

IP desk phones, browser and desktop softphones, phones inside your collaboration client, and analog phones, all on one platform with one dial plan.

IP and soft phones

Collaboration-client phones

One dial plan

Analog phones, kept and modernised

Keep existing analog handsets, ward and lift phones, door phones and fax lines. Connect them through FXS gateways in registration or trunk mode, with automatic port discovery and live status for every port.

FXS gateways

Registration or trunk mode

Live port status

Everyday calling features

Extensions, ring and hunt groups, voicemail, conferencing, transfer and business-hours routing, managed from one console.

Ring and hunt groups

Voicemail and conferencing

Business-hours routing

Secure, recorded where it matters

A built-in session border controller with intrusion prevention, encrypted signalling, and recording of chosen lines through iFlux Recorder.

Built-in SBC

Encrypted signalling

Recording by line

Works with what you run

SIP trunks and carriers

IP desk phones and softphones

Analog phones through FXS gateways

Deployment	Single box with recording, or distributed
Recording	iFlux Recorder, by line or for everyone
Deployment model	On-premise, air-gapped or bring your own cloud
Installation	Signed, offline installer

Where iFlux Unified Communications makes the difference

Replace an old phone system without replacing every phone

The old phone system is out of support, but hundreds of analog phones in wards, lifts and plant rooms cannot all be replaced at once.

OUTCOME

A supported phone system, with no forced handset replacement.

One phone system for offices and the contact centre

Office phones and the contact centre run on separate systems, so transfers break and costs double.

OUTCOME

One estate to run, one bill to reconcile.

Security, built in

- ✓ Role-based administration and audit log
- ✓ Per-install secrets and strong SIP passwords
- ✓ Intrusion prevention at the perimeter
- ✓ Encrypted signalling and media

See iFlux Unified Communications on your own infrastructure.
